## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 26, 2011 has been entered.

### ***Response to Amendment***

This Office Action has been issued in response to the amendments filed on August 26, 2011. Claims 1-20 are pending. Applicant's arguments have been carefully and respectfully considered.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-6, 9-14 and 17-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The devices of claim 1 are software, which is functional descriptive material and therefore non-statutory. (See MPEP § 2106-2106.02). The claims lack the necessary physical articles or objects to

constitute a machine or a manufacture within the meaning of 35 USC 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such they fail to fall within a statutory category. They are, at best, functional descriptive material per se. Everything claimed can be implemented on software. Software must be claimed with hardware or a proper computer readable medium. Nothing physical is contained in the body of the claims. The claims do not include any requirement of hardware. The body of the claims only discussed the functionality, which can be implemented in software alone.

***Allowable Subject Matter***

Claims 7, 8, 15 and 16 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The instant claims recite extracting a keyword from a plurality of keywords when both a corresponding keyword weight of the keyword was less than a first predetermined threshold at any time during a first predetermined time period prior to a time of the extraction, and the corresponding keyword weight was also greater than a second predetermined threshold at any time during a second predetermined time period, longer than the first predetermined time period, prior to the time of the extraction.
